

NATURAL GAS GATHERING AND PROCESSING + POWER PEAKING

Parkland / Mosquito Creek Complex

Parkland / Mosquito Creek

The interconnected Parkland and Mosquito facilities provide sweet gas gathering and processing for area producers. The plants are well-positioned to service associated gas in an oil play region. The complex includes a power peaking unit at Parkland.

THE STATS

- Sweet gas gathering, processing and NGL recovery capabilities
- Facilities located in Parkland and Mosquito Creek, AB
- 10 MW power peaking unit at Parkland

> These recently upgraded facilities are well-positioned in an oil play region.
